

Archbishop Tenison's

CHURCH OF ENGLAND HIGH SCHOOL

SIXTH FORM: Biology

Biology A-Level Course Overview

Through-out the course, students dive into a world of real-life biology applications. This is because we follow the Edexcel Biology A specification (Salters-Nuffield or SNAB), where the biology big ideas such are embedded in real-world contexts. These include Lifestyle, Health & Risk; Genes & Health; Biodiversity & Natural Resources.

What's great about Biology at Tenison's Sixth Form?

Students carry out ecological field work at the Field Studies Centre, with specialist tutors using specialist equipment and techniques.

Students gain confidence with designing experiments and the practical skills to carry them out and write a clear report in scientific style.

Smaller classes allow closer monitoring of progress and we give tailored support.

Opportunities and Successes

- *Sixth formers showing off high-quality work at sixth-form open evening in October*
- *A high success rate on the Whitgift and Croydon High biomedical diploma, a university-style enrichment programme where a very high percentage of our students taking part have gained distinctions.*
- *Previous students have taken their biology knowledge/skills in biomedical science, medicine and many other related fields.*
